

Post-blast Investigation Training for EOD Technicians on the Battlefield DVD and Reference Card Set

The Technical Support Working Group has released the Post-blast Investigation Training for EOD Technicians on the Battlefield Set for use by military EOD Technicians to conduct accurate and detailed post-blast investigations utilizing proper evidence collection and preservation techniques for a tactical approach.

This training product consists of training modules on a DVD and a 4x6 inch laminated card set of approximately 10 pages spiral bound on the long edge. The training DVD and the flipbooks must be ordered separately as indicated below.

The card set is for field use only and not required to complete the training. The card set is to be utilized as a reminder of the information that must be recorded on scene in order to complete an effective final report. This training package will prepare military EOD Technicians to conduct accurate and detailed post-blast investigations utilizing proper evidence collection and preservation techniques for a tactical approach. It focuses on the appropriate lexicon and stress continued attention to detail in reports to support military missions. Content conforms to the terms, language, and concepts of the Weapons Technical Intelligence (WTI) Improvised Explosive Device (IED) Lexicon (Dec 2008). Content covers post-blast incident assessments for EOD Technicians on the battlefield from arrival of the team on site to packaging of evidence

Due to the sensitive nature of its content, these training products are restricted and available only to Military Federal, Allied, State, and local governments involved in security and counter-terrorism activities. Contractors providing services and training to these agencies may also procure the products with the sponsorship of their contracting agency. The products are available from the Government Printing Office (GPO).
